-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 28 June 2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,435,179 to Walker in view of US 3,788,524 to Davis et al. Walker discloses a blood bag 1 with clear sides and a liquid therein. The bag comprises a connecting device or a cannula, 5, with a communicating portion or fluid delivery means 7. The device further comprises a hollow tube 3 and a break-off portion 8 that may be tinted, connected to the tubing via a weakened fracturing area 9. The break-off portion may have a lower specific gravity of the fluid in the bag, allowing it to float when broken off. See columns 2-3. Walker further does not disclose any obstructions in the bag preventing the float from migrating to the top of the fluid. Walker does not specifically disclose a liquid barrier seal and a piercing end, but he discloses such devices in column 1. Davis discloses a connector device with a sharpened end or spike in order to pierce a seal, further comprising a weakened or scored location where the spike may be broken off. Since such an embodiment is within the contemplation of the inventor, and it would have been obvious to one of ordinary skill in the art at the time of invention to add a liquid barrier seal and a piercing member to the disclosed Walker apparatus in order

Art Unit: 3762

to preserve the sterility of the bag and allow the connector to breach the seal as taught by Davis. Furthermore, it has been held that separation of an integral unit (as disclosed by Walker) into discrete bag and connector units as well as two tube portions (as claimed in the instant invention) is an obvious variation to one of ordinary skill in the art. See MPEP 2144.04.

### ***Response to Arguments***

3. Applicant's arguments filed 28 June 2004 have been fully considered but they are not persuasive.

4. In response to applicant's argument that the prior art does not teach the reason for the structure as claimed by applicant, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). However, the structural limitations of applicant's invention are clearly disclosed in the prior art of record, rendering the instant application unpatentable over the prior art.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3762

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
